All authors read and approved the final manuscript.

Funding

The authors received no specific funding for this work.

Declaration of Competing Interests

The authors declare that they have no competing interests.

Ethics Approval

This study presents a proof-of-concept platform for observational learning analytics evaluated in a controlled laboratory environment. The proposed system is intended exclusively to support educational observation and does not perform psychological, medical, or clinical diagnosis.

Consent to Participate

All demonstrations presented in this study involved volunteer members of the research laboratory who participated in the controlled proof-of-concept evaluation and authorized the use of their data for research purposes.

Consent for Publication

All authors have read and approved the final version of the manuscript and consent to its publication.

Data Availability Statement

The data supporting the findings of this study are available from the corresponding author upon reasonable request.

Acknowledgements

The authors thank the Graduate Program in Public Management and Digital Transformation of the Federal University of Tocantins for supporting this research.
